

Precision, flexibility and innovation.
Reitnouer delivers.

High-precision metal

Whether a contract production process for a specific component or overflow support for your internal fabrication and manufacturing lines, Reitnouer delivers the quality, responsiveness and flexibility you expect from a first-tier supplier. Guaranteed.

fabrication

Reitnouer is the partner you've been looking for.

HIGH-PRECISION METAL FABRICATION for such tolerance-intensive industries as aerospace, marine and transportation requires an extraordinary, precision, full-service supplier – one like Reitnouer.

The company's history is filled with innovation. In 1982, when Reitnouer introduced the first totally bolted aluminum flatbed trailer, it was an innovation that changed an entire industry. Today, nearly 40 years later, Reitnouer continues to deliver daily on its commitment to leadership and innovation – not only with stronger, lighter trailers that work hard for their owners, but with the precision engineering, machining and fabrication that make a Reitnouer trailer a Reitnouer. It's no wonder why Reitnouer is the design of choice for drivers everywhere and the standard by which all other trailers are measured.

Our precision machining and fabrication capabilities are testament to that leadership. In fact, Reitnouer is one of the most capable and experienced metal machining and fabrication firms that you'll find anywhere. Our roots in metal fabrication and tooling are deep. Our experience is broad, encompassing projects for applications that are as varied as they are demanding. And our flexibility and responsiveness are legendary. Just ask a Reitnouer customer. They'll tell you that no one works as hard, no one stands behind their work, and no one is a better partner than Reitnouer.

Because our equipment is computer-controlled and we have webcams throughout the facility, our technicians can monitor performance remotely, in the dark, while our technology "talks" to them in real time, 24/7. It's smart automation at work. It's the quality, efficiency and reliability you expect from Reitnouer.

**REITNOUER'S READING FACILITY
IS ISO 9001:2015 CERTIFIED**

At the heart of our robust capabilities are three things: technology, process and people.

AT REITNOUER, our entire production facility is ISO 9001:2015 certified, filled with advanced CNC and laser technologies. That's important because our equipment versatility and flexibility mean that we can apply the right tools for your project and deliver exceptional machining efficiencies and precision tolerances.

Our processes are the result of decades of experience on thousands of projects. With such a wide variety of project experience, we're able to match and adjust processes to a specific application for great efficiency, appropriate security and extreme accuracy. Whether it's a project that requires a unique workflow or one that needs a secure, dedicated project island, Reitnouer has the capability and experience to optimize the fabrication process to meet your project requirements.

Our people are experienced and some of the most inventive, engaged people you will ever meet. At every station, in every department, Reitnouer people make the difference in quality, flexibility and performance.

REITNOUER'S READING FACILITY
IS ISO 9001:2015 CERTIFIED

Our entire facility can be as flexible as you need it to be. We can do short-runs. We can set up dedicated project islands for clients. We can even create entire, dedicated production lines. World-class fabrication. World-class flexibility. World-class quality. All designed to deliver the optimal result for your projects.

“Yes, we can

Our non-corrosive metal polymer coating process delivers better performance than hot dip galvanizing for parts exposed to harsh environments. It's a process that can stand alone or the piece can be painted, according to your requirements and preferences.

do that.”

◀ *Our CNC capabilities include a 50-foot, five-axis bed. That means we can machine large, complicated parts accurately and efficiently—and that's just one example of having the right technologies for your project.*

It's smart automa

The Reitnauer Aluminum Flatbed Trailer is the largest selling line of aluminum flatbed trailers in North America. Over nearly 40 years of innovation, and millions and millions of miles of service, Reitnauer trailers are known for their exceptional engineering, their strength and durability and their ease of maintenance. And that comes from precision machining and fabrication.

Quality, innovation and customer-focus have guided Reitnouer since the beginning: leading, never following. And every day since 1982, there is one guiding object standing behind every Reitnouer, behind every innovation, behind every precision detail, behind every hero story, and that's Bud Reitnouer's commitment to building products, a brand and a company that he could be proud of.

tion at work.

Precision metal fabrication that is as flexible and responsive as you need it to be.

THE COMBINATION OF OUR TECHNOLOGY, our adaptive processes and our experienced people means that Reitnouer metal fabrication services can be as flexible and responsive as you need them to be. Because we're able to changeover quickly, we don't need long runs to be efficient. In fact, Reitnouer is a good choice for "Just In Time" manufacturing supply.

Depending on the project's needs, we can arrange our processes and facilities to deliver the optimal result for your projects. We can do short-runs. We can set up dedicated project islands for clients. We can even create entire, dedicated production lines. World-class fabrication. World-class flexibility. World-class quality.

We can also run in the dark for manufacturing efficiencies and high quality. Our equipment is computer-controlled, and we have webcams throughout the facility. That way, our technicians can monitor performance remotely, in the dark, while our technology "talks" to them in real time, 24/7. It's smart automation at work. Every day and night, as necessary, to deliver the quality, reliability and turnaround you expect.

Put Reitnouer to work for your bottom line.

WHATEVER YOUR METAL FABRICATION NEED – basic parts to complete assemblies; complex geometries to cell technology; long-run or short-run; dedicated line extension or overflow – Reitnouer is the first call for accuracy, efficiency, precision and responsiveness. Honestly, we are the partner you've been looking for.

Reitnouer Enterprises, a division of Reitnouer Inc. is
ISO 9001 CERTIFIED

Reitnouer's experience is broad, encompassing projects for applications that are as varied as they are demanding. And our accuracy, flexibility and responsiveness are legendary.

ABOUT REITNOUER, INC.

In 1982, when Reitnouer introduced the first totally bolted aluminum flatbed trailer, it was an innovation that changed the mindset of an entire industry. And through nearly 40 years of service since then, Reitnouer delivers daily on its commitment to leadership and innovation and to providing Reitnouer trailer owners with stronger, lighter trailers that work hard. It's no wonder why Reitnouer is the largest manufacturer of aluminum flatbed trailers in North America, the design of choice for drivers everywhere and the standard by which all other trailers are measured.

Precision Metal Fabrication

Collateral to the trailer manufacturing, Reitnouer is also home to one of the most capable and experienced metal fabrication firms anywhere. The company's roots in metal fabrication and tooling are deep. Reitnouer's experience is broad, encompassing projects for applications that are as varied as they are demanding. And our accuracy, flexibility and responsiveness are legendary.

The entire Reitnouer manufacturing facility is filled with advanced CNC and laser technologies, and our Reitnouer Enterprises Division is ISO 9001:2015 Certified. Our equipment versatility and flexibility mean that we can apply the right tools for client projects, we can machine large, complicated parts accurately and efficiently, and we can deliver exceptional machining efficiencies and precision tolerances.

Our quality control is strict, constant and consistent. Our quality teams have two parts: our technicians on the floor and a dedicated team of QC inspectors. Together, they work to deliver the high level of quality that customers have come to expect from Reitnouer.

So, whether it's a production process for a specialized trailers including flats beds, multi-axle, drop-decks, B-trains to name a few, both for commercial or military use, special component or overflow support for a prime contractor's fabrication and manufacturing lines—parts fabrication to the safety-related, tight-tolerance requirements of aerospace and milspec—Reitnouer delivers the quality, responsiveness and flexibility customers expect from a world-class vendor. Every project. Every day.
